

## Vectorian Giotto – how to make a flash banner in few steps

- open Vectorian Giotto
- File -> New Movie
- Modify -> Document -> change Dimensions

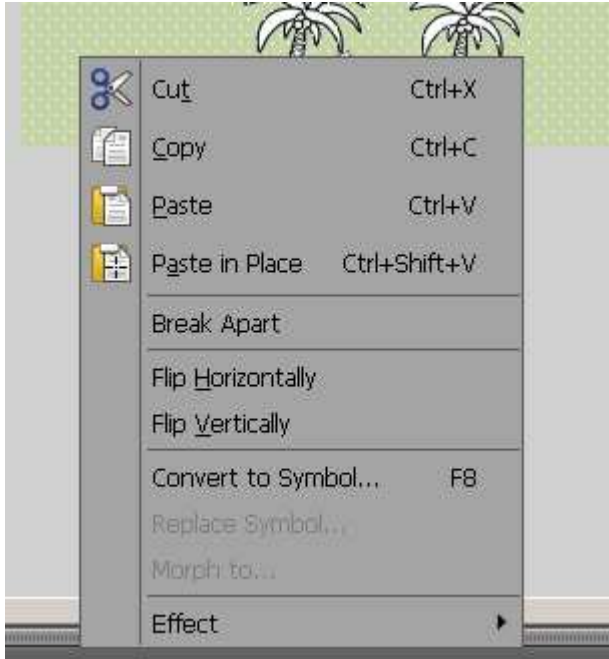

- save picture (same dimensions, .gif/.jpg) to clipboard
- right click to empty banner -> Paste

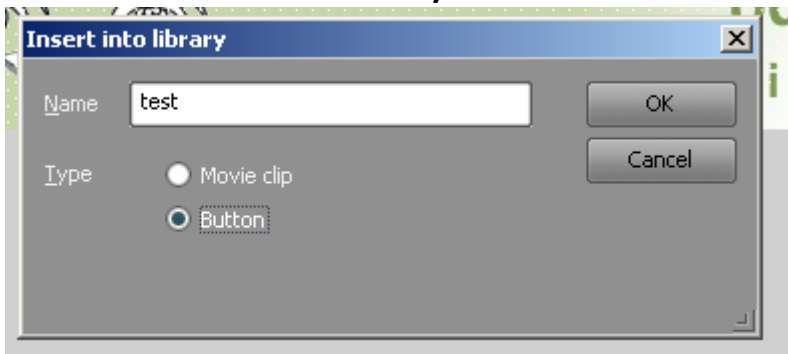

- pick Selection Tool

- click on banner
- right click on banner

- click Convert to Symbol

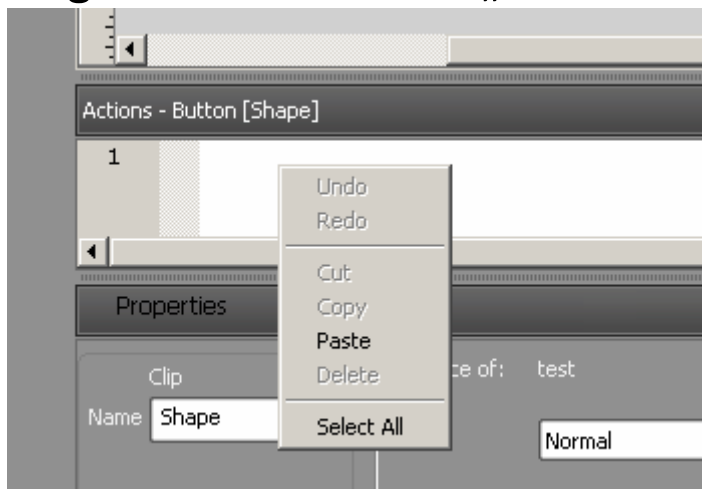

- make selection to „Button“

- save code to clipboard, something like that:

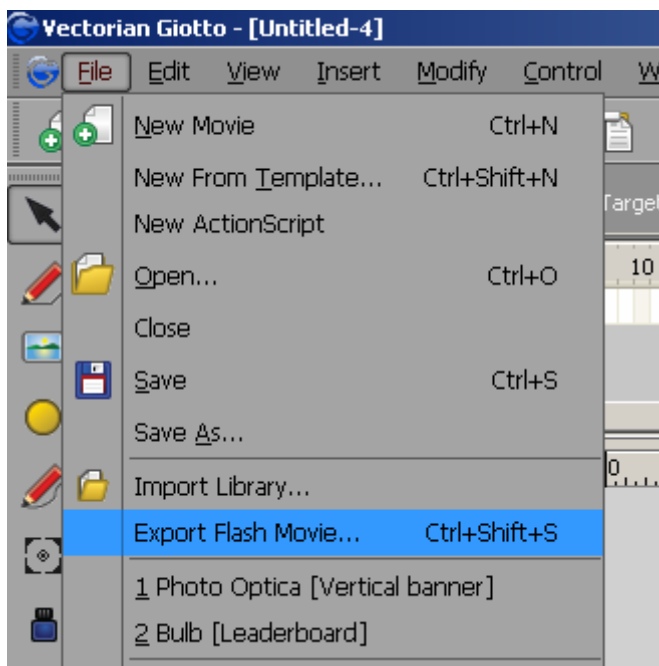

```
on(release) {  
  getURL("http://www.google.com", "_blank");  
}
```

- right click to section „Actions“

- Paste

- File - > Export Flash Movie

- Save
